

Smith Tip #5

Laundry Use

IMPORTANT FOR ADEQUATE VENTILATION

- **DO NOT USE** the washer or dryer if the laundry bi-fold door is closed. (The only time the bi-fold door should be closed is if the laundry is not in use).
- If washer or dryer is operating, in addition to bi-fold laundry door being open, the lounge room sliding door must be opened to allow adequate ventilation.
- **PLEASE CLEAN THE LINT FILTER AFTER EVERY USE.** Lint must not be allowed to build up on the laundry walls, floor or ceiling surfaces. If any lint is visible on surfaces it must be vacuumed or wiped off.
